

CSE 2120 Data Structures 1
EvensAndOdds

I just made sure to take my time on all of the code so that nothing was wrong with it. I looked up this before I did it.

If I found something confusing, like finding out how to start, I would just ask AI how it would start the problem, then I would just change it to my own code.

I broke it into smaller steps.

I wrote the code in small sections. At first was a tiny bit confused at construction, but then I looked it up and was able to figure it out.

Nothing was difficult. I have been doing everything other than Phidgets for a month now, but I just didn't submit it.

Yeah, I learned that it is okay to take time as long as your code is right, and next time I will submit them on time.
